

HOW TO PREP THE KITS

The first decision to make is how you'd like to store these task kits. Mine are stored in an Iris® Color Photo & Craft Keeper which can be purchased from Michaels or this link: <https://www.michaels.com/iris-color-photo-craft-keeper/10468242.html> There are other craft and photo containers (like the one pictured on the cover) but instead are clear and can be found on Amazon or this affiliate link: <http://bit.ly/TaskCardOrganizer> They can also be stored in the following options:

- plastic baggies
- pencil boxes
- baskets
- file folders

The container label gets printed and taped to the inside of the container. The cards get printed, matched together (back to back), and then laminated for durability. The Toothy mats can be laminated or kept inside of a sheet protector.

HOW TO PLAY TOOTHY

Each partner gets a Toothy mat and dry erase marker. Students will take turns choosing a card. Each student who is playing the game will solve the problem on their Toothy mat or dry erase board. When all who are playing have answered the question, they compare their answers and then turn the card over to check to see if their answer is correct. Those who have a correct answer get to draw a tooth in Toothy's mouth on their mat. If the student's answer is incorrect, they do not draw a tooth and those who got the answer correct must explain how they got to the correct answer. Then the next student draws the next card and the process is repeated. The game is over once all 27 cards have been answered. The student with the most teeth in Toothy's mouth is the winner of the game.

(MATH CARDS MAY NOT REFLECT THE SKILL
FOR THIS PARTICULAR RESOURCE)

WHAT'S INCLUDED:

27 GRAMMAR TASK CARDS
27 ANSWER CARDS
12 TOOTHY MATS (BOY & GIRL)
CONTAINER LABEL

(TOOTHY MAT MAY NOT REFLECT THE SKILL
FOR THIS PARTICULAR RESOURCE)
